

What is Archiving as a Service?

A fully managed archiving and data management service delivered by JD Edwards archiving specialists, designed to extend the life of your JD Edwards system and the hardware that it is running on.

Effective management of your JD Edwards data will improve your system performance which ultimately leads to improved employee performance and satisfaction levels.

What is Included?

The monthly / annual fee includes access to the *Purge-it!* Archiving Software Solution, implementation and configuration of your archive system, delivery of a data retention policy, regular archiving processes, and management dashboards for your team to view the process, progress, and analytical breakdown of your JD Edwards data.

Why could archiving as a service benefit you?

If you have never archived or purged, then you know this is something that you need to address, but for possibly many reasons, it keeps getting ignored. Talking to our clients, many delay their archiving because of:

- Not having a budget to spend on software to support the necessary task(s)
- Not having enough time to analyse the requirement and review product offerings
- Not having the in-house knowledge to run a purge and archive project
- Not having the in-house technical knowledge to set up an archive or determine what the best archiving approach might be
- Not having the business buy-in to create a suitable data retention policy to support the archive process

And how can JD Edwards Archiving as a Service help?

- No up-front software costs
- Archiving is delivered using the *As a Service* model and might not require Capital Expenditure
- Archiving specialists will review your data and help you to develop a meaningful data retention policy
- No in-house knowledge acquisition, or training is required
- Archive environment configuration is performed as part of the service
- Enables legal compliance with data legislation
- It removes the need to allocate staff to the housekeeping archiving project, and allows IT to get on with tasks that deliver more visible user business benefits
- Enables very quick delivery of an essential activity

The Best Plan for Your Business

Our fully managed archiving and data management service comes in different pricing plans to suit your individual company’s needs. Whether you are an existing *Purge-it!* user, don’t have an archiving solution, or want to switch from your current product, we have a plan for your business.

Sustaining	Basic	★ Most Popular Advanced	Professional	Enterprise
For existing <i>Purge-it!</i> customers only	For new or existing <i>Purge-it!</i> customers	For new or existing <i>Purge-it!</i> customers	For new or existing <i>Purge-it!</i> customers	For new or existing <i>Purge-it!</i> customers
From \$199/mth	From \$899/mth	From \$1149/mth	From \$1449/mth	From \$1799/mth
For existing <i>Purge-it!</i> customers who want to outsource the management of their data but already own the <i>Purge-it!</i> solution.	Minimum package for those that want to implement a purge and archive policy but have no software or in-house experience.	Our most popular plan for those customers with a more diverse data set and require advanced purge and archive functionality.	For customers with a larger database size who require extra targeting of tables outside the <i>Purge-it!</i> Standard Modules. Purge-it! Software

All Archive activities are performed through the industry leading *Purge-it!* software. Used by JD Edwards sites worldwide, you couldn’t be in safer hands.

Secure and Safe

All archiving is run by specialists with many years’ experience and the *Purge-it!* software ensures all archiving is fully audited and fully reversible.

Access to Archive Data

Archived data is fully accessible in your archive database either via access to a new ‘Archive’ environment or through *Purge-it!* applications direct from your Production environment.

Reporting Dashboards

Statistical analysis and archive activity available through powerful EnterpriseOne dashboards keeping you fully informed of all activities.
